

Komisja XVI – Łączenie polimerów i technologia klejenia

- XVI-960-14 Research into linear vibration welding of glass fibres reinforced Nylon 66 – A. Węglowska (Poland)
- XVI-961-14 Thermal degradation of PC and PA6 during laser transmission welding - P.J. Bates, T.B. Okoro, M. Chen (Canada)
- XVI-962-14 The setting behavior of dispersion adhesives during bonding of Wood Plastic Composites (WPC) – E. Moritzer, M. Hopp (Germany)
- XVI-963-14 Spin-Blind-Riveting - New technology to join metal with fiber reinforced plastic - A. Hälsig et al. (Germany)
- XVI-964-14 Welding of acrylics using laser beam: An experimental investigation – R.K. Mandal, A. Bandyopaghyay, S. Das (India)
- XVI-965-14 The influence of welding processes on the weld strength of flame-retardant materials – P. Lakemeyer, F. Evers, V. Schöppner (Germany)
- XVI-966-14 Hybrid joining by adhesive bonding and self-pierce riveting of Aluminium and UHSS for automotive applications – M. Matzke et al. (Germany)
- XVI-967-14 Experimental investigations and modelling of the melting layer in polymer-metal hybrid structures – K. Schricker, M. Stambke , J.P. Bergmann (Germany)
- XVI-968-14 Multi axial loading of thermoplastic laser welds – D. Spancken et al. (Germany)
- XVI-970-14 Measurement of the optical properties of thermoplastics used in laser transmission welding – X. F. Xu , P. J. Bates , G. Zak (Canada)
