

Komisja II – Spawanie lukowe

- II-1880-14 Cold cracking tests assessment for low transformation temperature martensitic stainless steels multipass welds – M. Paquin, D. Thibault, P. Bocher (Canada)
- II-1881-14 Effects of PWHT on the microstructure and mechanical properties of ERNiCrFe-7 all-weld metal – R.R. Shen et al. (Sweden)
- II-1882-14 Pitting corrosion resistance of lean duplex welding consumables – M.F. Gittos et al. (UK)
- II-1883-14 Modelling mechanical properties of 9% Cr. - Weld metals and literature review of toughness models – M. Schuler et al. (Austria)
- II-1884-14 Influence of boron and nitrogen in the HAZ of modified 9Cr-1Mo steel - M.F. Gittos et al. (UK)
- II-1886-14 Role of inclusions for formation of acicular ferrite in low carbon steel weld deposits – A. Takada, H. Terasaki, Y. Komizo (Japan)
- II-1887-14 Effect of microalloy elements on austenite grain growth and microstructure evolution in simulated heat affected zones of S690Q steel - L. Zhang, Th. Kannengiesser (Germany)
- II-1888-14 The development of acicular ferrite in reheated Ti-B-Al-N type steel weld metals containing various levels of aluminium and nitrogen - M.N. Ilman, R.C. Cochrane, G.M. Evans (Indonesia/UK)
- II-1889-14 Formation of Mn-depleted zone in Ti-containing weld metal – K. Seo et al. (Korea)
- II-1890-14 Evaluation of the weld properties of modified EN 1.4003 steel- Mechanical, microstructural, toughness and corrosion aspects – E. Taban (Turkey)
- II-1891-14 Residual stress of repair welds in high strength low alloy steel - R. Schasse, Th. Kannengiesser, T. Mente (Germany)
- II-1892-14 Ductility-dip cracking in the base metal heat - affected zone of wrought nickel base alloys – C. Fink, M. Zinke (Germany)
- II-1893-14 Improving welding stresses by filler metal and heat control selection in component related butt joints of high strength steel - D. Schroeffer, A. Kromm, Th. Kannengiesser (Germany)
- II-1894-14 Properties and weldability of modified low transformation temperature filler wires – A. Kromm et al. (Germany/The Netherlands)

- II-1897-14 Round robin of trace elements – Part 2 – Pb and Bi - D. Kotecki ,T. Melfi (USA)
- II-1898-14 Interlaboratory round robin test for chemical analysis of SAW Flux – D. Kotecki (USA)
- II-1899-14 2014 Update on standards for welding consumables under review – D. Fink (USA)
- II-1910-14 The effect of martensite on cold crack in YS 600MPa grade FCA weld metals by using Y-groove test – M. Lee et al. (Korea)
- II-1912-14 Fume emission rates for gas metal arc welding with cored wires - K. Höfer , M. Kusch, P. Mayr (Germany) *VIII-2177-14*
- II-1914-14 Development of a method for determination of the hydrogen content of solid wire electrodes for fusion welding of aluminum and its alloys– R. Lahnsteiner, M. Angerhausen, U. Reisgen (Germany)
- II-1917-14 Elemental segregation during resistance spot welding of boron containing advanced high strength steels – M. Amirhalingam et al. (The Netherlands)
- II-1918-14 Correlation between the welding process and the development of fumes – L. Costa (Italy) *VIII-2183-14*
- II-1919-14 The influence of differential hardness between weld metal and base metal on the susceptibility to stress corrosion cracking of low carbon pressure steel – D.J. de Beer, M. du Toit, H. Froneman ((South Africa)
- II-1921-14 List of documents CII 2014 – G. Posch (Austria)
