

#### **Komisja IV – Spawanie wiązką skoncentrowanej energii**

- IV-1153-14 Influence of the CO<sub>2</sub> content on operational performance of short-circuit GMAW – O. Liskevych, A.Scotti (Brazil) *XII-2158-14, 212-1308-14*
- IV-1154-14 Amendment to the reversed Marangoni flow theory taking place in the weld pool of the ATIG welding – T. Sándor (Hungary) *XII-2159-14, 212-1318-14*
- IV-1155-14 Influence of shielding gases on the thermal efficiency during arc welding: an experimental investigation – J.-P. Planckaert (France) *XII-2160-14, 212-1310-14*
- IV-1156-14 Investigation of a welded seam formation of submerged arc welding by CFD simulation of heat-mass transfer, electromagnetic and hydrodynamics processes supported with experimental researches - U. Reisgen et al. (Germany) *XII-2161-14, 212-1316-14*
- IV-1157-14 A study on start behavior in Gas Metal Arc Welding – P. Li et al. (Sweden) *XII-2156-14, 212-1309-14*
- IV-1158-14 Laser welding and additive manufacturing at Cranfield University – P. Colegrove et al. (UK) *XII-2157-14, 212-1314-14*
- IV-1159-14 Reconstruction of 3D transient temperature field for fusion welding processes on basis of discrete experimental data - A. Pittner, V. Karkhin, M. Rethmeier (Germany/Russia) *XII-2163-14, 212-1311-14*
- IV-1160-14 Research of technological opportunities of arc welding and surfacing with pulse feeding of electrode wire without feedback to welding power source - V. Lebedev, I. Lendiel, U. Reisgen (Germany) *XII-2162-14, 212-1313-14*
- IV-1161-14 A novel thermal sensor applied to laser cladding – H. Köhler et al. (Germany) *XII-2166-14, 212-1315-14*
- IV-1162-14 Sheath modelling for TIG welding – M. Lohse, S. Rose, U. Füssel (Germany) *XII-2164-14, 212-1317-14*
- IV-1163-14 Influence of plasma properties on metal transfer phenomena in Gas Metal Arc Welding - M. Tanaka, M. Shigeta (Japan) *XII-2167-14, 212-1319-14*
- IV-1164-14 Numerical simulation of metal transfer in argon gas shielded GMAW - Intermediate Report - Y. Hirata, Y. Ogino, N. Nitta (Japan) *XII-2168-14, 212-1312-14*
- IV-1165-14 Qualification of electron beam welding for the production of a Breeder Unit for the HCPB TBM for ITER – S. Krasnorutskyi et al. (Germany)

- IV-1169-14 The electron beam as a welding tool: German study on the state of the art and future requirements - S. Böhm (Germany)
- IV-1171-14 Metallurgy and strength behaviour of laser wire cladded layers using pulsed Nd: YAG lasers - J. Neubert, S. Keite (Germany)
- IV-1172-14 Electron beam welding of aluminium to copper: Mechanical properties and their relation to microstructure - U. Reisgen, C. Otten, M. Schmachtenberg (Germany)
- IV-1173-14 A comparative study on microstructure of Inconel 617 welding joint fabricated by fiber and CO<sub>2</sub> lasers – Z. Li et al. (China)
- IV-1174-14 Mapping of stress raising in laser clad components depending on geometry and defects - A.F.H. Kaplan et al. (Sweden/Finland)
- IV-1176-14 Laser materials processing of CFRP composites using a nanosecond – pulsed Q-switch YAG laser – M. Kutsuna, H. Inoue (Japan)
- IV-1177-14 AWS D20 committee fabrication of additively manufactured parts – D.D. Kautz et al.(USA)
- IV-1179-14 Improvement of fatigue life and surface properties of high reliability metallic parts by laser shock processing. Application to stress relief in welded joints - J.L. Ocaña et al. (Spain)
- IV-1180-14 Development of a laser welding and straightening process for aircraft structures for hybrid laminar flow control – V. Schultz et al. (Germany)
- IV-1182-14 Fundamental research of 100 kW ultra-high power fiber laser welding – S. Katayama et al. (Japan)
- IV-1183-14 Super-high power fiber laser welding under low vacuum and its phenomena – S. Katayama et al. (Japan) *XII-2193-14, 212-1342-14*
- IV-1184-14 Decreasing pore formation in multiple-sheet laser joining with interfacial polymeric contaminations – P. Woizeschke, E. Mosgowoi, F. Vollertsen (Germany)
- IV-1185-14 Aluminum welding by combining a diode laser with a pulsed Nd:Yag laser - J.P. Bergmann, M. Bielenin (Germany)
- IV-1186-14 Determinations of net heat input in arc welding – O. Liskevych, A. Scotti (Brazil) *XII-2187-14, 212-1322-14*
- IV-1187-14 Index for identifying high and low power input into the workpiece for GMAW – G. Huismann, A. Burt (Germany) *XII-2178-14, 212-1337-14*

- IV-1188-14 Wire-feed additive manufacturing of metal components: technologies, developments and future interests – D. Ding et al. (Australia) *XII-2181-14, 212-1338-14*
- IV-1189-14 3D dynamic distribution of arc radiation in pulsed-current micro-plasma arc welding – J. He, S. Lin-Yang, F. Wang (China) *XII-2188-14, 212-1332-14*
- IV-1190-14 Dynamic variation of keyhole exit and its inclination in plasma arc welding - Z.M. Liu, C. S. Wu (China) *XII-2173-14, 212-1339-14*
- IV-1191-14 Contact-less temperature measurement and control with applications to laser cladding - H. Köhler, C. Thomy, F. Vollertsen (Germany) *XII-2189-14, 212-1340-14*
- IV-1192-14 Estimation of welding deformation based on CFD process simulation – J. Cheon et al. (Rep. of Korea) *XII-2190-14, 212-1327-14*
- IV-1193-14 Interaction of CO<sub>2</sub> - laser beam with argon plasma of gas tungsten arc - U. Reisgen et al. (Germany/Ukraine) *XII-2191-14, 212-1329-14*
- IV-1194-14 3D simulation of arc plasma and weld pool behavior for coupled arc assisted activating TIG welding – D. Fan et al. (China) *XII-2192-14, 212-1330-14*
- IV-1195-14 Additive manufacturing, derivative of welding & joining technology- A literature review – S. Marya et al. (France/India/USA) *XII-2185-14, 212-1341-14*
- IV-1196-14 Super-high power fiber laser welding under low vacuum and its phenomena – S. Katayama et al. (Japan) *XII-2193-14, 212-1342-14*
- IV-1197-14 In-situ alloying of AISI 410l martensitic stainless steel with nitrogen during laser cladding – C.J. Van Niekerk, M. Du Toit, C. Van Rooyen (South Africa) *XII-2194-14, 212-1343-14*
- IV-1198-14 Molten pool flow patterns in high power laser keyhole welding – S.W. Han, J. Cheon, S.J. Na (Rep. of Korea) *XII-2195-14, 212-1328-14*
- IV-1199-14 The electron beam as a tool for joining technology – Böhm (Germany)
