Weldability of novel Fe-Mn high-strength steels for automotive applications - D. Keil, M. Zinke, H. Pries (Germany)

Localised corrosion resistance of welded austenitic and lean duplex stainless steels – M. M. Johansson et al (Sweden)

Effect of Phosphorous and Silicon on hot cracking susceptibility of 14Cr-15Ni-2.3 Mo Ti-modified fully austenitic stainless steel - G. Srinivasan et al (India), A. Klenk (Germany)

Contribution to the capability of filler metals to influence pulsating fatigue life - M. Stoschka et al (Austria)

Properties of modern boron-alloyed creep resistant FCAW welds - S. Baumgartner, G. Posch, P. Mayr (Austria)

Additional recommendations for welding Cr-Mo-V steels for petrochemical applications - C. Chovet, J.P. Schmitt (France)

Matrix of ISO filler metal draft standards - Status as of June 2010 - D. Kotecki (USA)

Proposed round robin reproducibility of measurement of trace elements in steel weld metal - D. J. Kotecki (USA)

Welding stainless steels - Experience with water heaters – E.M. Westin, D. Serrander (Sweden)
Komisja III – Zgrzewanie rezystancyjne i procesy pokrewne

III-1570-10 Better understanding of the upset welding process - K. Matsuyama, K. Hasegawa, Y. Takahashi (Japan)

III-1571-10 FEM simulation of resistance spot welding in high strength steel sheets for auto-body - G. Murayama, H. Oikawa (Japan)

III-1572-10 Resistance spot welding of magnesium alloy sheets with cover plates - G. Murakami, et al (Japan)

III-1573-10 Performance of resistance spot welded joints in advance high strength steel in static and dynamic tensile tests - N. den Uijl et al (Netherlands)

III-1574-10 joint characteristic improvement during high frequency welding by process integrated weld treatments – H. Wiche, V. Wesling, A. Schram (Germany)

III-1575-10 Advanced eddy current probes: developments and applications to FSpW and composite materials - T.G. Santos et al (Portugal), R. M. Miranda (Germany)

III-1576-10 A concept of RSW monitoring system for a stable weld quality - I. Polajnar, P. Podržaj - (Slovenija)

III-1578-10 Influence of production-related gaps on strength properties and deformation behaviour of spot welded TRIP Steel HCT690T - S. Brauser (Germany)

III-1579-10 Case study for welding simulation in the automotive industry - W. Perret et al (Germany)

III-1581-10 Welding range scatter assessment - T. Dupuy, E. Groleau (France)

III-1582-10 Induction excited thermography: a technique for defect visualizing at semi-structural adhesive bonds in car body structures - C Srajbr et al (Germany)

III-1585-10 Methods to obtain weld discontinuities in spot welded joints made of advanced high strength steels - H. Gaul et al (Germany)
Comparison of wire electronic discharge machined and saw cut surfaces in Nitronic 40 stainless steel and vanadium materials - D.D. Kautz, P.W. Hochanadel (USA)

Measurement and simulation of residual strain in a laser welded titanium ring - S. Kabra et al (USA)

Laser beam welding in vacuum - A comparison with electron beam welding - U. Reisgen, S. Olschok, S. Longerich (Germany)

Image processing within robot based laser remote systems - From blind to viewing welding technologies - N. Meißner et al (Germany)

Laser twin-spot welding of 20 µm thick coated galvanised thin sheet C-Mn steels - J. Löthman, J. Hedegård, A. F. H. Kaplan (Sweden)

Welding of galvanized high-strength steels in a gap-free lap joint configuration by high-power fiber laser - S. Yang, B. Carlson, R. Kovacevic (USA)

Multi-passes narrow gap laser welding process for thick section stainless steels - S. Tarasawa et al (Japan)

Application of laser-arc hybrid welding to shipbuilding – H. Goda, H. Koga (Japan)

Laser welding of super elastic NiTi shape memory alloy - L. Alberty Vieira et al (Portugal)

Characterisation of focus shift in high power fiber laser welding - F. Vollertsen, D, Reitemeyer (Germany)

Development of high-quality laser welding process of magnesium alloy with modulated laser beam - T. Hoshino et al (Japan)

Development of Laser cutting method of mild steel plate using numerical fluid analysis – M. Nohara et al (Japan)

Laser beam weldability of austenitic and austenitic-ferritic high-manganese stainless steel sheets - V. Quiroz, A. Gumenyuk, M.Rethmeier (Germany)

Laser shock processing effectiveness in increasing the reliability of welded joints - D. Iordachescu et al (Spain), P. Vilaça (Portugal)

Distortion effects in micro welding with single-mode fiber laser - C Thomy, F. Möller, F. Vollertsen (Germany)

Interaction and influence of arc and laser welding parameters on the formation of laser GMA hybrid welds - J. Neubert, A. Dumm (Germany)

Sensitisation of AISI 409 ferritic stainless steel during low heat input arc welding – M. Du Toit, C. Van Niekerk (South Africa)

Welding properties of duplex and superduplex stainless steels: Conventional and novel processes - E. Taban, E. Kaluc (Turkey)

Element distribution in lean duplex stainless steel welds – E.M. Westin, S. Hertzman (Sweden)

Weldability in dissimilar welds of steels to Ni-base alloys – B.T. Alexandrov et al (USA)

Weld properties and weldability in Sandvik Sanicro 69 filler materials – Z. Zhou, P. Stenvall (Sweden)

Influence of embedded microfissures on fatigue resistance of a welded joint - J. Wahlsten et al (Sweden)

Reference photo guide for stainless steel welds – B. Holmberg (Sweden)

Role of sulphur and phosphorus on ductility-dip cracking in multipass weld metal of alloy 690 – K. Nishimoto et al (Japan)

Effects of PWHT temperature on mechanical properties of high-cr ferritic heat-resistant steel weld metals - L. Chen, K. Yamashita (Japan)

Improvement in creep resistance of modified 9Cr-1Mo steel weldment by boron addition - C.R. Das et al (India)

Influence of pulse shaping during laser welding of lightweight materials – J. Wilden, T. Neumann, S. Jahn (Germany)

Systematic examination of precipitation phenomena associated with hardness and corrosion properties in friction stir welded aluminum alloy 2024 – S. Kurihara, Y. S. Sato, H. Kokawa (Japan)

Properties of laser-GMA-hybrid welded joints of X-70 pipe steel – P. Bernasovský et al (Slovakia), S. Grünenwald et al (Germany)

The lattice misfit between inclusion and acicular ferrite in low carbon low alloy steel weld – T. Yamada, H. Terasaki, Y. Komizo (Japan)

Hydrogen evolution from the welded joints with austenitic martensitic microstructures – K. Tadashi, H. Yuji, I. Hiroshige (Japan)
IX-2347-10  Effects of post weld heat treatment procedures on the hydrogen diffusion in high strength steel welds - T. Mente, Th. Boellinghaus, M. Schmitz-Niederau (Germany)

IX-2348-10  Grain size of acicular ferrite in ferritic weld metal – H.J. Kim, H.-S.Ryu (Republic of Korea)

IX-2351-10  Microstructural characteristics of copper cladding stainless steel made by cold spray and GTAW – H.-J. Sung, I.-P. Hong, K.-J. Kim (Republic of Korea)

IX-2352-10  A study of the continuous cooling behaviour and effect of preheat and interpass temperature on the HAZ of high strength quenched and tempered steel – L. Kuzmikova et al (Australia)

IX-2353-10  Comparable evaluation and investigation of sensitivity to hot cracking of welds and welded joints in welding of alloy Inconel 690 using wires Inconel 52 and Inconel 52 MSS – K. A. Yushchenko et al (Ukraine), E. Guyot (France)
Komisja X – Zagadnienia konstrukcyjne połączeń spawanych – zapobieganie pękaniu

X-1672-10 Influence of cooling channel in first and side walls on welding residual stress of test blanket module for ITER - S. Nakamura et al (Japan)

X-1675-10 For safety of mega container ships, evaluation of brittle fracture toughness and investigation of structural arrestability – N. Kiji et al (Japan)

X-1676-10 Numerical investigation on BS-CTOD and ASTM-CTOD – T. Tagawa et al (Japan)

X-1677-10 Correction of fracture toughness for constraint loss in structural components. ISO27306 vs. FITNET/BS7910 – F. Miniami, M. Ohata, Y. Yamashita (Japan)

X-1678-10 Strain-based fracture assessment method in Japan: WES 2805-2007 - Y. Hagihara (Japan)

X-1679-10 Influence of weld strength mis-match on failure behaviour of strain hardened austenitic stainless steel - P. Nevasmaa et al (Finland)

X-1680-10 Fatigue and Fracture Strength of Ship Block Joints Welded with Large Gaps W. Fricke et al (Germany)

XIII-2336-10 Analysis of residual stress relief using cyclic hardening models - D. Siegele, S. Moroz, I. Varfolomeev (Germany)

X-1682-10 Treatment of welding residual stresses in probabilistic failure assessment of pipes - I. Varfolomeev, D. Ivanov, D. Siegle (Germany)

X-1683-10 Strain distribution in welded aluminium alloys - M. Workowski, T. Nitschke-Pagel, K. Dilger (Germany)

X-1684-10 Calculation of welding residual stresses under complex process condition - M. Urner, T. Welters, K. Dilger (Germany)
X-1686-10  IIW round robin residual stress calculations and measurements - H. Wohlfahrt,

**XIII-2349-10**  T. Nitschke-Pagel, K. Dilger (Germany)

**XV-1359-10**

X-1688-10  Highlights of residual stress profile development for IIW FFS Annex C - P. Dong (USA)

X-1689-10  Characterization of weld residual stresses: A fitness-for-service prospective - P. Dong (USA)

X-1690-10  A Note on the Comparison of CTOD calculated to BS 7448 and ASTM E1820 – A. Malpas, H. Pisarski (UK)

X-1692-10  Residual stress in steel welded repairs measurement, simulation, and fitness-for-purpose assessment – A. M. Paradowska et al (United Kingdom)
Komisja XII – Elektryczne spawanie łukowe w osłonie gazów i pod topnikiem

XII-1983-10 Surrogate modelling and approaches towards self-optimisation for complex GMAW processes - U. Reisgen et al (Germany)

XII-1984-10 Numerical and experimental studies of the influence of process gases in TIG welding – J. Zahr et al (Germany)

XII-1985-10 Cathode focussed TIG – fundamentals and applications – M. Schnick et al (Germany)

XII-1986-10 Development of submerged arc welding method in a vertical-up position – R. Sakamoto et al (Japan)

XII-1987-10 Development of submerged arc welding in vertical up position - a study on welding consumables for 9%Ni steel – M. Mizumoto, H. Nagasaki (Japan)

XII-1989-10 Applications of innovative variants in MIG/MAG welding – N. Pepe et al (Portugal)

XII-1992-10 Selecting optimized gas mixes to increase first the welding performances (MIG &TIG) of the light material - J.M. Fortain (France)

XII-1993-10 Spatter and fume reduction in CO2 gas shielded arc welding by regulated globular transfer – K. Yamazaki et al (Japan)

XII-1994-10 Melting phenomenon of hot-wire GTA and hot-wire laser welding process – K.Shinozaki et al (Japan)

XII-1995-10 Visualization and digitization of welder’s skill for education and training – S. Asai, T. Ogawa, H. Takebayashi (Japan)

XII-1998-10 Heat transfer to the wire electrode in AC-MIG welding – G. Huismann (Germany)

XII-1999-10 Computational fluid dynamics analysis of shielding gas behavior in tungsten inert gas welding of titanium plate – Y. Wada et al (Japan)

XII-2000-10 Experimental study of erosion of hafnium electrodes for oxygen plasma arc cutting – Y. Yamaguchi et al (Japan)

I-1176-10

XII-2002-10 Development of welding monitoring system for in-process quality control of thick walled pipe - Y. Fujita et al (Japan)

XII-2004-10 An approach to adaptive control of GMAW based on laser profile measurement – D. Bračun, I. Polajnar, A. Sluga (Slovenija)

XII-2005-10 Monitoring and control of arc and weld pool by power source characteristic and torch weaving in V groove gap welding – K. Oshima et al (Japan)

XII-2006-10 Characterization of cold lap defects in tandem arc MAG welding – P. Li (Sweden)
Komisja XIII – Wytrzymałość zmęczeniowa konstrukcji i elementów spawanych

XIII-2299-10 Commission XIII Fatigue of welded components and structures – G. Marquis (Finland)

XIII-2312-10 Fatigue design of welded structures – effects of weld quality and residual stresses - Z. Barsoum (Sweden)

XIII-2313-10 An efficient meshing approach for the calculation of noth stresses - J. Baumgartner, T. Bruder (Germany)

XIII-2314-10 New results in multiaxial fatigue of welded aluminium joints - J. Wiebesiek, C. M. Sonsino (Germany)

XIII-2315-10 Interpretation of overload effects under spectrym loading of welded high strength steel joints - C. M. Sonsino et al (Germany)

XIII-2316-10 Fatigue Life Extension Procedure by Ultrasonic Peening - L. L. Martinez (Netherland)

XIII-2317-10 Development of weld quality criteria based on fatigue performance – B .Jonsson et al (Sweden), G. Marquis (Finland)

XIII-2318-10 Influence of embedded microfissures on fatigue resistance of a weld joint J. Wahlsten et al (Sweden)

IX-2329-10 Stress analysis and fatigue life assessment of welded structures - G. Glinka (Finland), A. Chattopadhyay (Canada)

XIII-2320-10 Inventing Ultrasonic Impact Technology and its Industry Impact – L. Kelner, D. Sharman (USA)

XIII-2321-10 Classification of several welded joints for load carrying attachments according to their fatigue strength – F. Maltrud et al (France)

XIII-2322-10 The peak stress method for fatigue strength asseesments of welded joints withdewl weld root failures – G. Meneghetti, P. Lazzarin (Italy)

XIII-2323-10 On relation between fatigue properties of welded joints and quality groups in ISO 5817 - A. Hobbacher, M. Kassner (Germany)

XIII-2326-10 Investigation of ultrasonic peening for upgrading a welded steel structure – S. J. Maddox, M. J. Doré, S. D. Smith (United Kingdom)

XIII-2327-10 Fatigue life improvement of steel fillet welds by hammer, needle or shot peening – S. J. Maddox (United Kingdom)
Improving the fatigue strength of misaligned butt welds - S. J. Maddox (United Kingdom)

The modified Wöhler curve method applied along with the reference radius concept to design welded joints against multiaxial fatigue – L. Susmel, R. Tovo (Italy), C. M. Sonsino (Germany)

Low and high cycle fatigue behavior of load-carrying cruciform welded joints containing incomplete penetration and strength mismatch – T. Hanji, Ch. Miki, K. Saiprasertkit (Japan)

Weld repair for fatigue cracked joints in steel bridges by applying low temperature transformation welding wire – Ch. Miki, T. Haji, K. Tokunaga (Japan)

Development of new database of fatigue damage and repairing cases by using editor-friendly platform – Ch. Miki et al (Japan)

Effect of plate thickness on fatigue strength of typical welded joints for a ship structure - T. Fukuoka, K. Mochizuki (Japan)

Reinforcement for fatigue damage in welded joints between vertical stiffener and steel deck plate with L-shaped steel plates – T. Mori, H. Harada (Japan)

Effect of plate thickness on extremely low cycle fatigue strength of welded joints – K. Tateishi, S. Hanibuchi (Japan)

Fatigue and fracture strength of ship block joints welded with large gaps - W. Fricke et al (Germany)

Application of the notch stress intensity and crack propagation. Approaches to weld toe and root fatigue – C. Fischer et al (Germany), P. Lazzarin (Italy)

Increasing fatigue strength of welded joints by ultrasonic impact treatment - Y. Kudryavtsev, J. Kleiman (Canada)

Measurement of residual stresses in welded elements and structures by ultrasonic method - Y. Kudryavtsev, J. Kleiman (Canada)

Study on the preciseness of hot spot stress of welded joints derived by shell Finite Element Analyses – N. Osawa et al (Japan)

Fatigue behaviour of braze welded t joints - I. Huther et al (France)
